

PRODUCT SPECIFICATION SHEET

PYC-14 is a natural fermentation product consisting of live yeast cells, B-complex vitamins, enzymes, and metabolites ready to aid in nutrition. **PYC-14** converts the indigestible and insoluble proteins, starches and fibers of grains into a more ready form for assimilation, resulting in a greater release of energy from the feed.

Every ounce of **PYC-14** has gone through a process of wet fermentation and dehydration under low temperature to preserve all of the enzymes. Feed digestion is an enzymatic process and **PYC-14** enzyme spectrum is very important since it helps support digestion and absorption of feed nutrients.

GUARANTEED ANALYSIS

Live Yeast Cell Count, min.....	7.0 x 10 ⁹ CFU/ oz
(<i>Saccharomyces cerevisiae</i>)	14.0 x 10 ⁹ CFU/ 2 oz

TYPICAL ANALYSIS

Protein	13% min
Crude Fat.....	2% min
Crude Fiber	5.75% max
Calcium.....	8% min
Calcium.....	10% max
Ash	25% min

INGREDIENTS

Active *Saccharomyces cerevisiae* yeast grown and dormantized on ground yellow corn, corn gluten meal, condensed fermented corn extractives, cane molasses, malted barley, dried grain products, calcium carbonate, and mineral oil.

FEEDING DIRECTIONS

For dairy cows feed 2 oz per head per day.

STORAGE & HANDLING

Store in a cool, dry area for maximum stability.
